A message form Pete, Ron and the club committee

Hi Guys, after all our hard work during the past 6 years a sad day for AMARC but true, look at the attached photos from David Moore. I bet butter would not melt in the little darlings mouths according to their Mums, I doubt they ever had Dads

Our flying site at Weston in Gordano was vandalised a couple of nights ago, our Brush cutters and strimmers, the Frequency Checker and battery, noise meter and new Chain saw were all stolen along with a large gas cylinder, Hard hats and face visors. Luckily they were unable to force entry into our concrete garage . We lost all the clubs old records, all our cutlery and crockery, the Ladies Loo, cooker, fridge and the best Caravan all in all about a £1000 worth of total loss and the only positive out of this is that none of us got hurt.
